

Part 4

	AdaBoost	GBM	XGBoost
Goal	Focus on misclassified samples	Minimize differentiable loss	Improve GBM efficiency
Tree	Shallow stumps	shallow trees	Optimized CARTs
handling missing data	No	No	Yes
Parallelization	No	No	Yes
Speed	Moderate	Slow	fast
Regularization	None	Minimal	L_1 & L_2 penalties
Error correction	Reweights misclassified points	Fits new trees to residuals	Fits new tree to gradient of loss
